TARGIT FOR YOUR RENTAL HOUSE:

With an Exclusive Solution for Texada

Custom Infrastructure

TARGIT's newest business intelligence accelerator (BIA) was created exclusively for the Texada platform, with a pre-built, custom infrastructure, out-of-the-box reporting features, and robust analytics dashboards that update in real time.

Seamless Experience

Use our BIA to connect TARGIT Decision Suite to your Texada quickly and easily.

Eliminate months of setup time and hours of manual reporting with a user-friendly BI solution that delivers value from day one.

## Complete Visibility Across Your Operations

Redefining Analytics for Rental Houses

We leveraged decades of heavy equipment and rental experience to combine the power of TARGIT Decision Suite with a solution that jumpstarts BI initiatives and puts your data within reach. Implement a pre-built BI system and use our recommended metrics to start tracking your rental house's most impactful performance metrics.

Unify Data Sources

Connect disparate data sources and legacy management systems through TARGIT InMemory to create a comprehensive view of your dealership's data. Then, leverage dashboards and reports in TARGIT Decision Suite to share high-value insights with everyone on your team.

Turn Insights into Action

Eliminate hours of manual reporting and keep critical data from falling through the cracks with a real-time dashboard.

A dashboard that gives you the power to study trends, improve data-driven forecasting, and make smarter business decisions.
